## Traffic Light System

### Mobile Compactable 85 Multiled Traffic Light System

This innovate design offers:

- LED that minimize power consumption
- sunscreen caps to improve brightness and visibility.
- the compact design to minimize space
- the lanterns can be well protected during transportation
- Power supply is 12V D.C.

### Mobile Traffic Light Controllers CSQ\_2V

Our made-in-Italy technology enables to manage accurately a pair of working zone traffic light without cable connection.

- standard traffic light cycles
- flashing yellow and light off
- the timing of the cycles is set by the knobs
- low battery LED indicator

### SOLAR PANEL

Integrate solar energy into traffic products, (solar warning highway lights, solar street lights)

Monocrystalline cells provide high efficiency with different power

Range (10W, 20W & 50W, etc)
